

SAFETY MISSION STATEMENT

YOUR DAILY SAFETY AWARENESS AND PRACTICE OF GOOD SAFETY PROCEDURES ARE NECESSARY AND DEMANDED FOR THE SAFE AND HEALTHFUL OPERATION OF QB CORPORATION.

It is your right to go home in as good condition as when you arrive.

QB Corporation's paramount obligation is to provide a safe and healthful work environment. This can be achieved through training, information, proper equipment, and discipline provided to all levels of employees regarding proper work practices and safe operating practices. In order to establish and organize good safety policies and procedures, the General Safety Policies and Procedures Manual is to be followed by all employees. Achievement of this goal is to be checked through regular inspections of the facility and equipment.

QB Corporation will comply with appropriate safety and security laws and regulations such as those established by: The Occupational Safety and Health Act (OSHA), The Environmental Protection Agency (EPA), The Department of Transportation (DOT), and all other applicable federal, state, and local safety and health regulations.

The Employee's primary responsibility at every level is to know and follow the safety practices described in the written safety plans. It is your responsibility to learn the location of all safety and emergency equipment, as well as the appropriate safety contact phone numbers. All employees are responsible to help identify potential hazards, and to be active in the Safety Recommendation Group (SRG) committee, and any other safety prevention program when asked.

QB Corporation believes that the safety of employees is of utmost importance, and it is an equal partner with quality, production, and cost-control.

Let's all do our part.

Mike Lane
President / General Manager
QB Corporation
